Office Action Summary	Application No. 10/821,784	Applicant(s) VIELHABER ET AL	
	Examiner Felix O. Figueroa	Art Unit 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 September 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 11-15 is/are pending in the application.
- 4a) Of the above claim(s) 11 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 12-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 11 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 September 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

This application contains claim 11 drawn to an invention nonelected with traverse in the Paper filed January 13, 2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Objections

Claims 12-15 are objected to because of the following informalities:

In claim 12 line 12, either "of" or "in" should be deleted.

In claim 15 line 12, either "of" or "in" should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Carter (US 3,923,367).

Carter discloses a plug (Fig.2) for a coaxial cable adapted to be received in a coupler, the plug comprising: a contact pin (72) having a tubular portion (82) extending axially rearwardly from a contact portion (80) thinner than the tubular portion, the tubular portion being adapted to receive a conductor (126); an insulator (76) coaxially

Art Unit: 2833

surrounding the contact pin and hugging the tubular portion while defining an annular space around the contact portion, the insulator being formed with at least two outer rings (at 98, and at 111) axially spaced there-along; and an outer conductive sleeve of sheet metal (74) surrounding the insulator over an entire length thereof and lying against an outer surface at least in a region at which the insulator defines the annular space and a region of the insulator axially remote therefrom, the outer conductive sleeve having at least two ring shaped outwardly extending bulges (98,110), at least one of the bulges (98) receiving at least one of the outer rings (at 98), the outer conductive sleeve having a lug (134) on an end thereof remote from the annular space for fastening to a cable.

Regarding claim 13, Carter discloses the outer conductive sleeve being formed with a recess (between 98 and 110) receiving a spring ring (64) bearing inwardly on the outer conductive sleeve.

Regarding claim 14, Carter discloses the lug being a crimp lug.

Regarding claim 15, Carter discloses a plug (Fig.2) for a coaxial cable adapted to be received in a coupler, the plug comprising: a contact pin (72) having a tubular portion (82) extending axially rearwardly from a contact portion (80) thinner than the tubular portion, the tubular portion being adapted to receive a conductor (126); an insulator (76) coaxially surrounding the contact pin and hugging the tubular portion while defining an annular space around the contact portion, the insulator being formed with at least two outer rings (at 98, and at 111) axially spaced there-along; and an outer conductive sleeve of sheet metal (74) surrounding the insulator over an entire length thereof and

lying against an outer surface of at least in a region at which the insulator defines the annular space and a region of the insulator axially remote therefrom, the outer conductive sleeve having at least two ring shaped outwardly extending bulges (98,104), at least one of the bulges (98) receiving at least one of the outer rings (at 98), the outer conductive sleeve having a lug (134) on an end thereof remote from the annular space for fastening to a cable, a third bulge (110) being formed on the outer conductive sleeve between the outwardly extending bulges, and a constriction between the third bulge and the crimp lug.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2833

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (571) 272-2800 Ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
